

Integrale...For

one pass seed bed preparation

A UNIQUE MACHINE DESIGNED TO WORK DIRECTLY INTO STUBBLE OR AFTER THE PLOUGH TO ACHIEVE VERY EFFICIENTLY A PERFECT SEED BED

THE WORKING SPEED, THE SOIL LEVELLING AND MIXING CAPACITY MAKE THE INTEGRALE A VERY VERSATILE AND EFFICIENT TOOL TO REDUCE CULTIVATION COSTS TO A MINIMUM.

WORKING ON PLOUGHED LAND

DIRECTLY INTO STUBBLE

MODELS 250 - 300 - 400 RIGID AND 400 - 500 HYDRAULIC FOLDING

-  TWO ROWS OF LEADING RIGID TINES TO PENETRATE THE SOIL UP TO 35CM
-  TWO SPIKED ROLLERS MOUNTED ON A TANDEM SYSTEM. THEY WORK AT DIFFERENT SPEED TO CRUSH THE CLOUDS, CHOP AND MIX THE STRAW... WHICH IS TRAPPED BY THE REAR TINES AND THROWN BACK THROUGH THE FRONT ROLLERS UNTIL IT IS FINELY MIXED WITH SOIL.
-  TWO ROWS OF HEAVY DUTY SPRING TINES TO WORK THE SOIL TO A LEVEL WHICH IS SUITABLE FOR DRILLING
-  REAR PACKER ROLLER TO CONTROL THE WORKING DEPTH, CONSOLIDATE AND LEVEL THE SOIL
